

Ameya Bhat

Project Manager

CO, USA | +1 (720) 843-7819 | ameya.bhat@gmail.com | [LinkedIn](#)

SUMMARY

Project Manager with **3 years of experience** delivering Projects meeting all customer requirements with minimal delay and cost over runs. I have helped manage communications from the user to the C-suite to ensure project conformance to the SOW. I am also **PMP certified** to help me plan and regulate the project more comfortably. I have handled projects in various fields including education, social change, hospitality, manufacturing and real estate.

SKILLS

- **Project Leadership:** Internal Custom Software (High level reports pulled from Jira, Salesforce) Scheduling, task dependency mapping, ownership of deliverables, risk tracking, mitigation planning, KPI Definition
- **Communication:** MS Teams, Slack, Outlook, Adobe PDF, Docusign, Cross-functional collaboration, stakeholder alignment, and external client coordination
- **Systems Engineering:** DoD, NASA, SysML, Innoslate, Requirements creation and analysis
- **Process Optimization:** Workflow streamlining, delay mitigation, and resource allocation planning
- **Financial Acumen:** Budget control, ROI evaluation, and financial analysis for engineering projects using Power BI, Excel,
- **Quality & Delivery:** Ensuring on-time, within-budget delivery using project management best practices.
- **Data Science & Analytics:** Exploratory Data Analysis, Statistical Analysis, Hypothesis Testing, Product Analytics, User Behavior Analysis, Churn Analysis
- **GenAI:** Prompt Engineering, OpenAI /GPT APIs
- **Programming & Querying:** Python, R, SQL
- **Project Management:** Jira, Agile/Scrum, Git, MS Project

EXPERIENCE

Assistant Project Manager | Maxwell CubeSat | CO, USA

Oct 2025 - Present

- Scheduled and coordinated task dependencies, ensuring clear ownership of deliverables and on-time completion.
- Maintained and updated the risk tracker, documenting blockers, cascading impacts, and mitigation actions. Created Finance documents and linking them to other documents to track all expenses with a Cost Centre.
- Mapped user engagement drop-offs across the funnel using large-scale behavioural event data, synthesizing signals into testable hypotheses that directly steered roadmap prioritization.
- Assessed external client change requests, analysing their effects on timelines, resources, and overall project delivery.

Instructor Assistant | University of Colorado | CO, USA

May 2025 - Jul 2025

- Guiding young adults in underserved communities' to explore University education.
- Helped provide basic STEM education including concepts like Physics, Chemistry, Algebra and Geometry to help them navigate college STEM subjects.

Business Analyst | LeadSquared |BOM-Bangalore, India

Jan 2023 - Jul 2024

(Leadsquared is a SaaS CRM start-up making customizations for end-to-end business processes)

- Managed IT infrastructure for 25 educational institutions and related services, completing projects within an average of 3 months while overseeing up to 3 concurrent deployments.
- Delivered 12 IT infrastructure and application system projects for accredited universities, developing data collection, storage, and analytics platforms to improve sales and marketing insights through integrated DevOps and Cloud engineering collaboration.
- Implemented user productivity tracking via scheduled tasks and activity logs, identifying business process gaps and reducing lead leakage to 0%.
- Delivered 8 projects for study-abroad agencies, developing opportunity management systems to match students' course and country preferences based on feasibility and priority—reducing lead conversion time by 70% and increasing customer satisfaction by 40%.
- Served as both Solution Architect and Project Manager, designing scalable, data-driven systems and optimizing integration workflows to improve solution delivery efficiency and reduce implementation time across projects.
- Coordinated collaboration across cross-functional teams—including DevOps, Cloud, and Solution Architecture—to streamline communication, align project goals, and ensure seamless end-to-end delivery.

Machine Shop Intern | Godrej and Boyce Mgf. Ltd |BOM, India

Jan 2022 - Jul 2022

- Developed a degrees-of-freedom model to optimize an ongoing project, enhancing precision and operational control.
- Presented the model to a heavy-machinery team to improve safety and workflow efficiency.
- Designed and implemented custom fixtures and support structures, reducing production cycle time from 45 to 30 days while maintaining full tolerance compliance.

EDUCATION

Master of Engineering in Engineering Management | University of Colorado, Boulder | USA
Bachelor of Technology in Mechanical Engineering | Manipal Institute of Technology | India

Aug 2024 - May 2026
July 2019 - May 2023

PROJECTS and PAPERS

End-to-end Admission System for Amrita Vishwa Vidyapeetham (Bgt-\$100K)

- Created a multi layered system for Marketing, Sales, Finance, Admissions, C-suite teams to be seamlessly able to, access and interpret data of the students as well as to communicate with each other about said data.
- Designed, through cross-team meetings, API integrations for Data archiving and Commissions calculation with disbursements
- Implemented a Student facing portal able to accept data in the form stated by the University and provide all communications sanctioned by the University.

From Fiction to Claim: Contextual Identifiability in LLM-Generated Discourse

- Propose the concept of Deep Writes in LLMs
- Worked on the concept of synthetic sexual intimacy with LLMs
- Propose the right to not be rendered
- Accepted for publication at BeyondFacts at ACM WWW 2026

Alignment Ghost – A Redteaming and Guardrails Builder

- Preventing any narrative changes to be exploited for nefarious purposes, saving you millions in legal proceedings
- Built IP protection and relationship agreements for the organization
- Provided Product Development expertise, developed user stories and directed UI/UX

PawNation, an NGO for the wellbeing of Dogs (Bgt-\$500)

- Led a Dog-loving team of 15 people to help them personify their love by providing them with the necessary Capital, Training and a Space for them to perform NGO activities.
- Launched an Ad-campaign bringing about awareness and critical funding needed to keep the lights on along with taking feedback through social platforms like Instagram.
